

The Ultimate Ottoman Made in New England

The Ultimate Ottoman is unique in many ways. It was designed with versatility and comfort in mind.

Z-BO is an excellent way to elevate your legs for some rest and relaxation. Chairs of any height are not a problem. Z-BO can be set up at any angle because of its two-leg design for maximum comfort. Z-BO folds to be carried or stowed away when not in use. It is constructed of hard wood, White Ash (baseball bats are made of this material) for greater strength. Your calves and heels rest upon a heavy-duty canvas for durability. By using Z-BO, the pressure on your lower back is relieved by elevating your feet, which makes your sitting position more Comfortable.

Z-BO is a great product to use after experiencing an injury to a lower extremity such as a hip, knee, ankle, foot or a break to a bone. The healing time for an injury can take many months. Being able to raise one or two feet from the floor, can and will help with comfort and blood circulation. Carry Z-BO with you wherever you go, on or off crutches so you will always have a place to rest your legs and feet.

It's a proven fact Z-BO really works!!!
